

Automatic Valve Applicator Model APVA-6000

Application

This machine will take

- a stack of pre-made pouches
- a drum full of degassing valves

to heat seal the valve onto the inner side of the pouch.

It is suitable to produce pre-made pouches for

- Coffee beans
- Dough
- Garlic
- Kimchi
- Microwaveable bags

Specification

Machine Model	APVA-6000
Overall dimensions	865x1290x1800 mm
Total weight	470 Kg
Air pressure	6 bar
Power	220-480V /1P/50 - 60Hz
Min bag width	80 mm width with 25mm gusset per side

APVI 6000 Features

- Touch screen operation
- Consistent quality, no human error
- One operator can look after 2 machines
- Auto stacking possible
- Price FOB Taiwan USD 39,600.00

Degassing Valve Choices

- WIPF Valve
- Pacific Valve
- Goglio Valve
- Bosch Valve

Standard Set Up WIPF

Technical Information

- Pouches compartment to store a full stack.
- Pouch pickup, sealing, punching and ejecting finished pouches are all automatic.
- Digital Counter is integrated in touch screen to give warning when preset amount is reached
- Digital Sealing Timer is integrated in touch screen for adjustable sealing time.
- Digital Temperature controller is included for adjustable temperature.
- Air filter-regulator: Adjustable sealing pressure to assure consistent quality.

- Ability to change sealing tools to fit different sizes of valves.
- Equipped with valve vibrating drum to increase efficiency.
